

Chief Engineer Leadership Training Program

The International Union of Operating Engineers announces their most current offering to train the next generation of Chief Engineers.

This redesigned course is built by experienced Chief Engineers. Uniquely designed for real-world application in industry! It covers a variety of topics needed by the Chief Engineer to efficiently operate their facilities.

Materials include:

Lesson presentations
Instructor manual with teaching tips and lesson plans
Student presentations with activities and quizzes
Multimedia to energize your lessons

Topics covered in the course:

- Effective Communication
- Budgeting and Reporting
- Conflict Resolution
- Managing Change
- Hiring and Interviewing
- Management Practices
- Effective Time Management
- Working with Contractors
- Contract Reviews

This course will assist learners in becoming skilled Chief Engineers.
